Factory Management — Create a Factory

Add a factory profile with its location, scale, equipment and certificates, so you can link it to suppliers, products and inspections.

Module	Supplier / Factory Management
Start here	https://qmas.icw.io/supplier-manager/suppliers → Factory tab → Create Factory
Direct link	https://qmas.icw.io/supplier-manager/factory/create
Steps	1 Factory Profile → 2 Classification → 3 Certification → Done
Checked against	QMAS dev, 4 Nov 2026

Overview

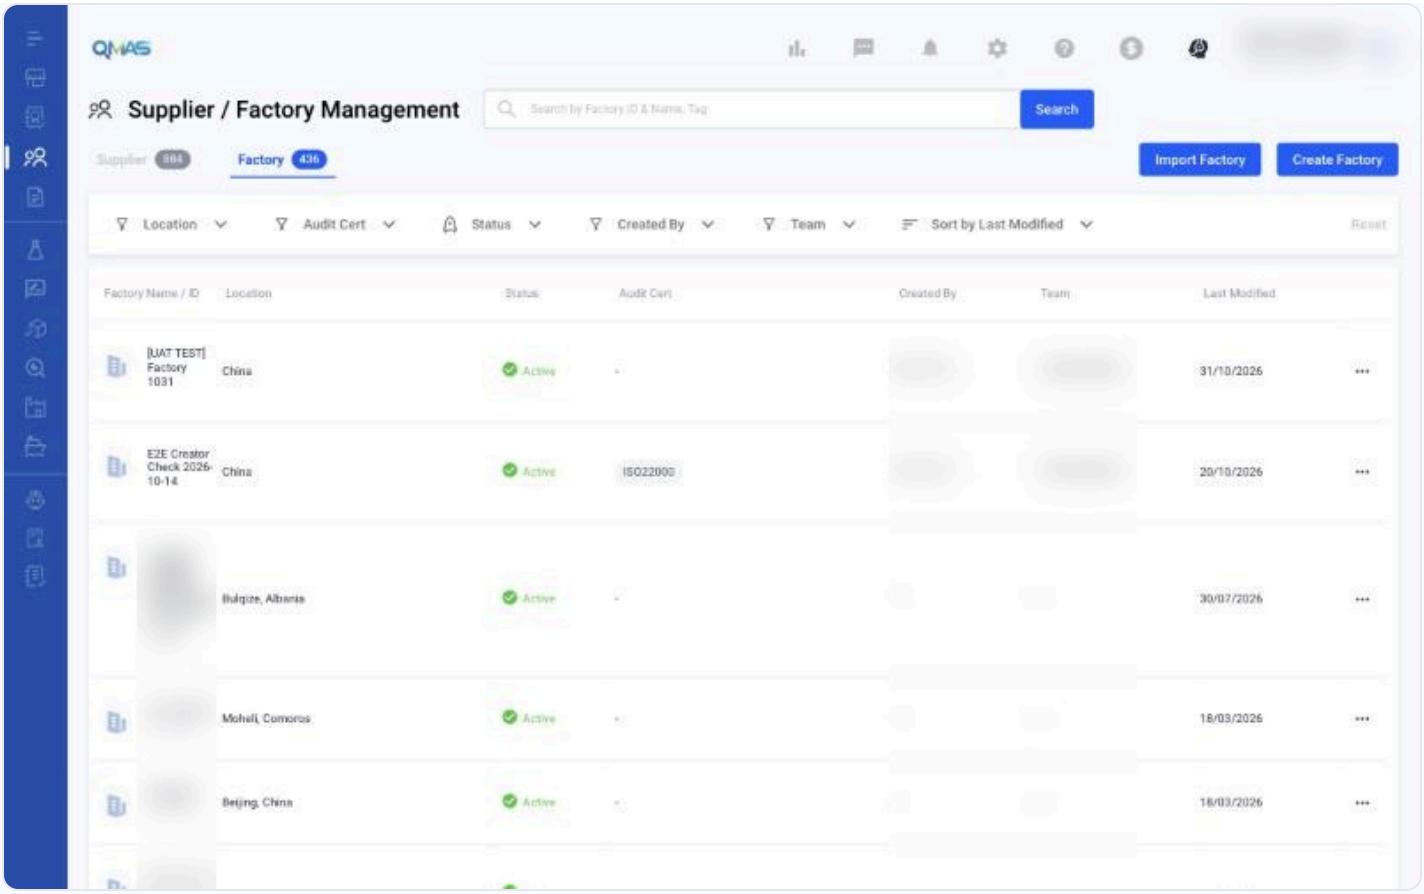

1. Open **Supplier / Factory Management**, click the **Factory** tab, then **Create Factory**.
2. **Factory Profile**: overview, scale, equipment and contact.
3. **Classification** (optional): product category and tags.
4. **Certification** (optional): add audit reports or certificates, then click **Done**.
5. The factory profile opens.

Step-by-step

1. Open the Factory tab

In the left menu, open **Supplier / Factory Management** and click the **Factory** tab. It lists your factories with location, status and audit certificates.

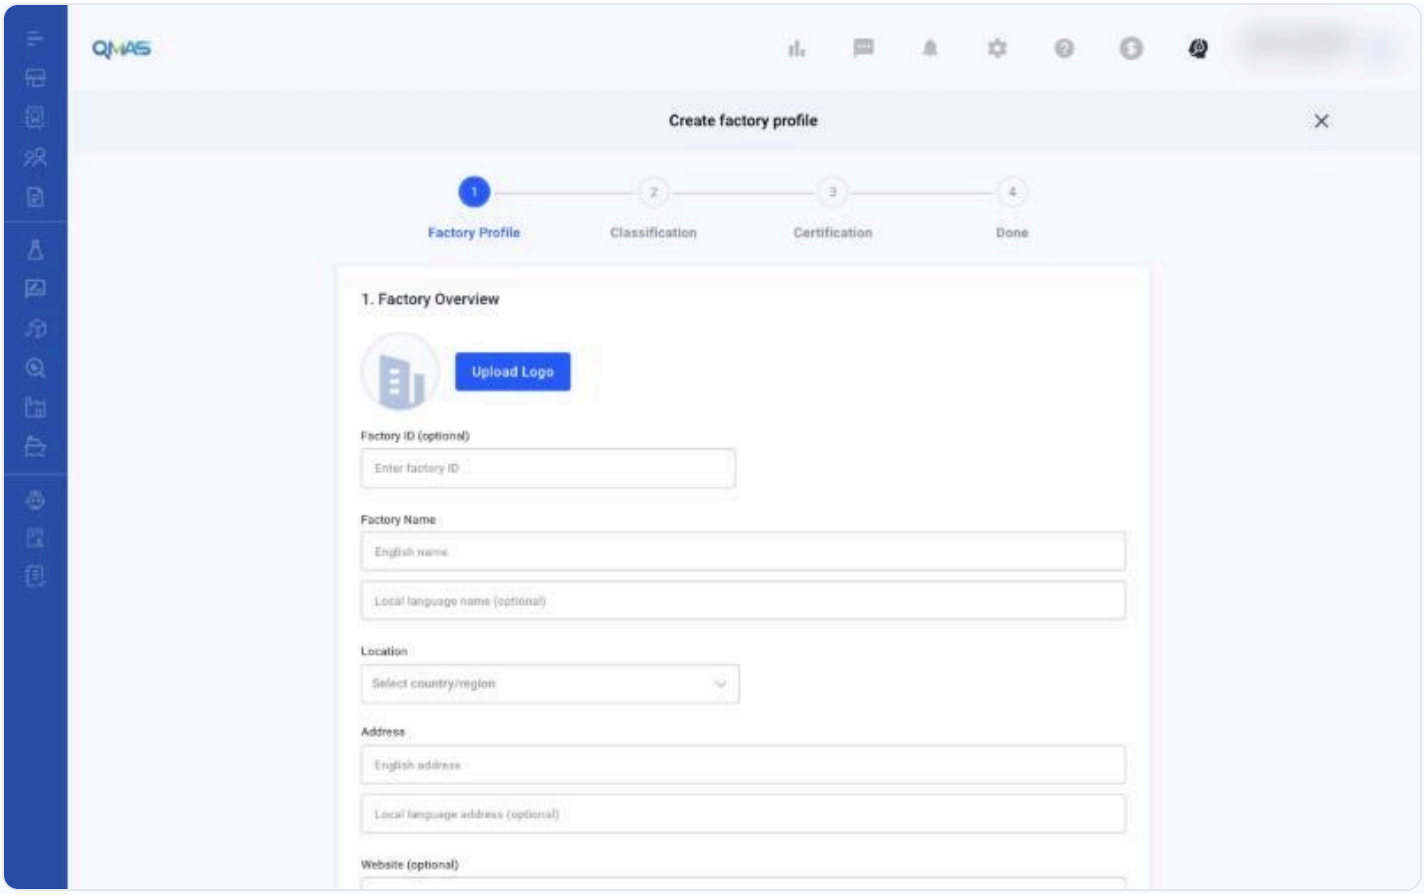

Click **Create Factory**, or **Import Factory** to add many factories from a file.

Factory tab with Import Factory and Create Factory.

2. Factory Profile — overview

- **Upload Logo** and **Factory ID** (optional).
- **Factory Name**: English name (required) and local-language name (optional).
- **Location**: country or region, then province and city.
- **Address**: English address (required) and local-language address (optional).
- **Website** (optional).

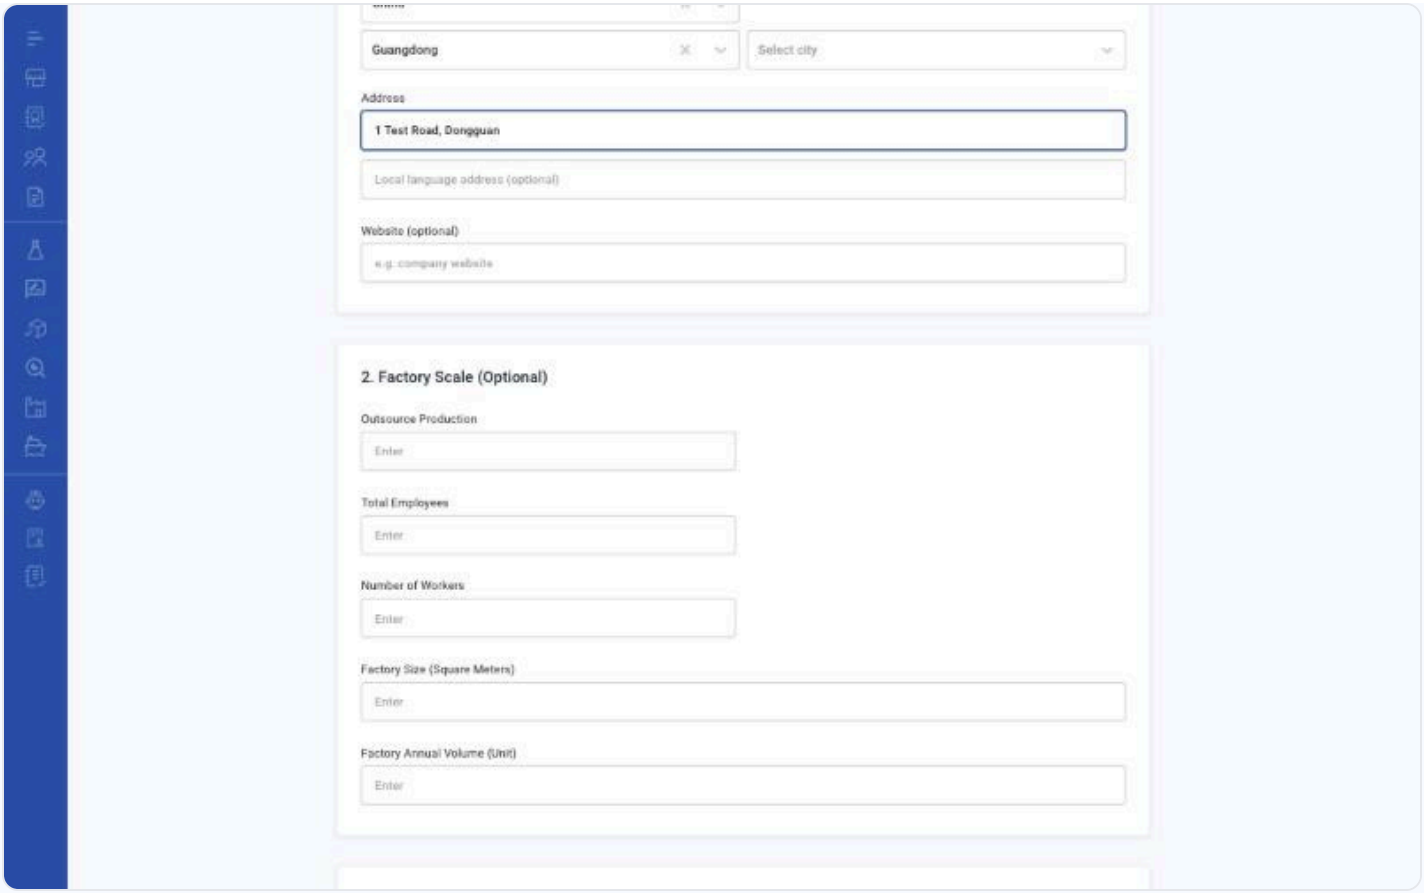

Create factory profile — step 1, Factory Overview.

3. Factory Profile — scale and equipment (optional)

Factory Scale: outsource production, total employees, number of workers, factory size (square meters) and annual volume.

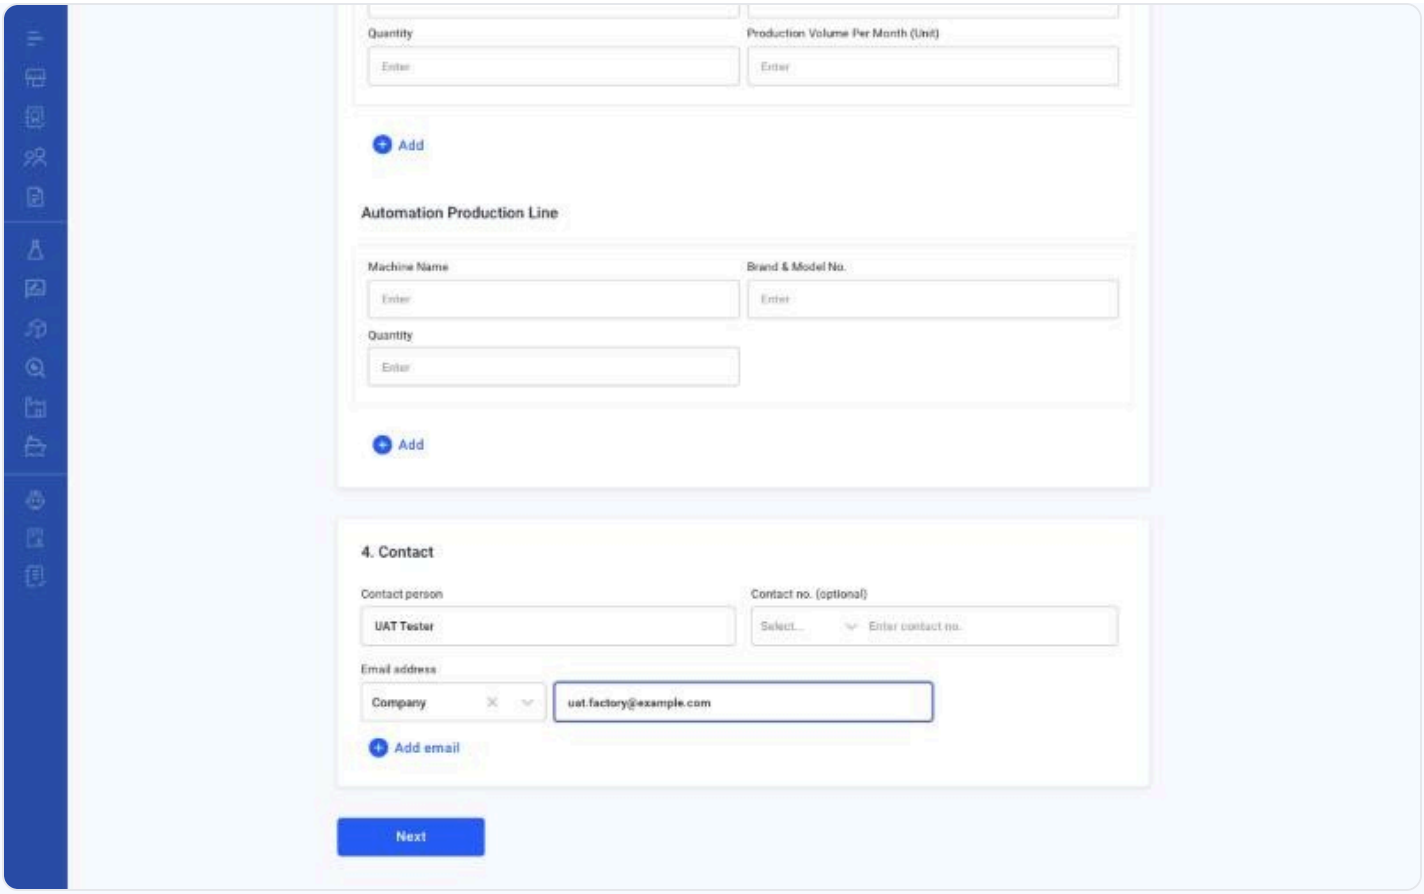

The equipment section lists machines and **Automation Production Line** entries: machine name, brand and model no., quantity and monthly production volume. Click **Add** for more rows.

2. Factory Scale (optional).

4. Factory Profile — contact

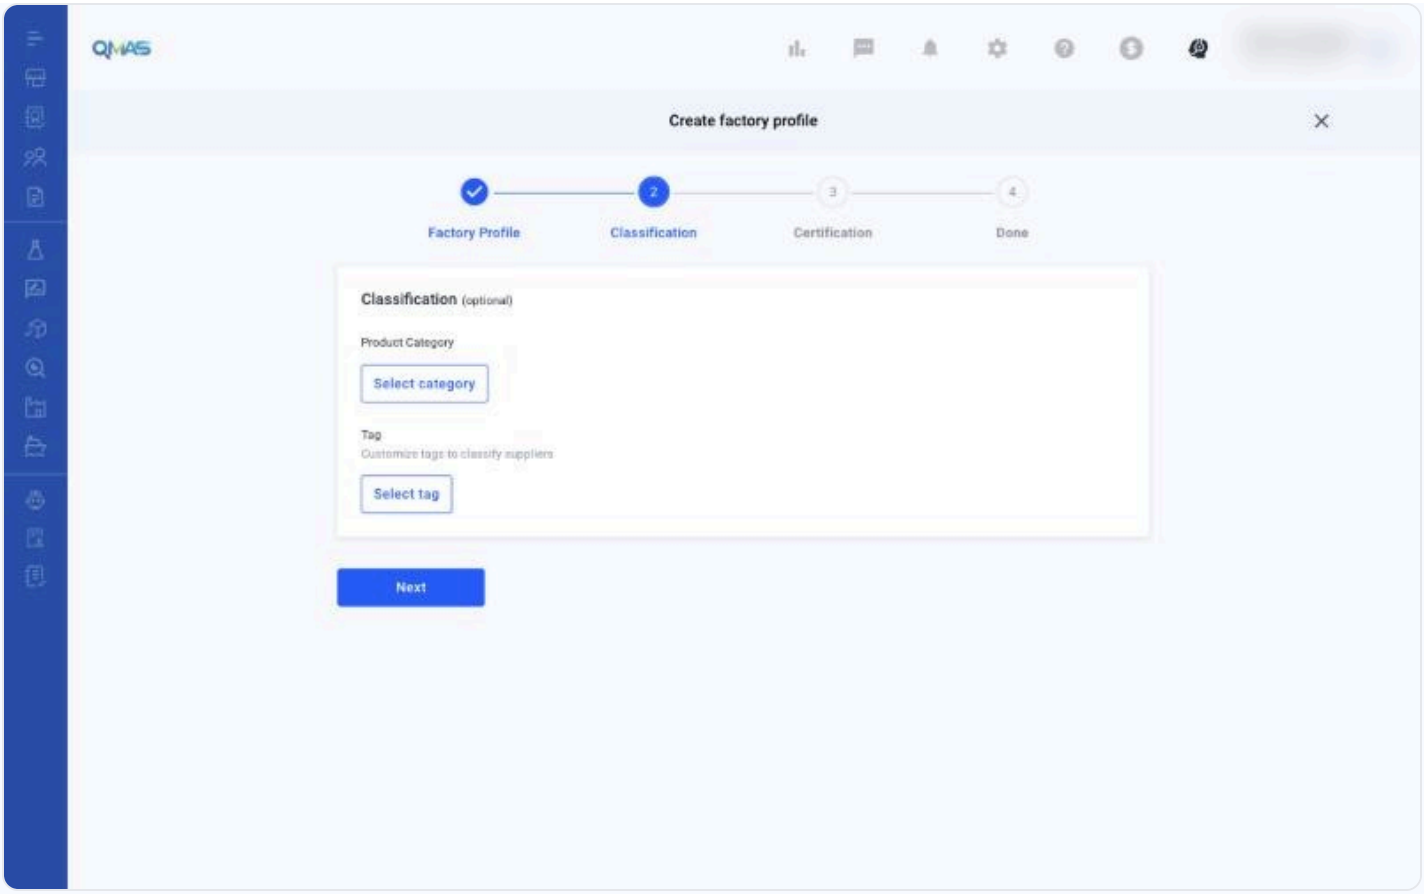

Under **4. Contact**, fill in the **Contact person** and an **Email address** with its type (Company, QA, Sales or Other). **Contact no.** is optional. Click **Next**.

Contact section and Next.

5. Classification (optional)

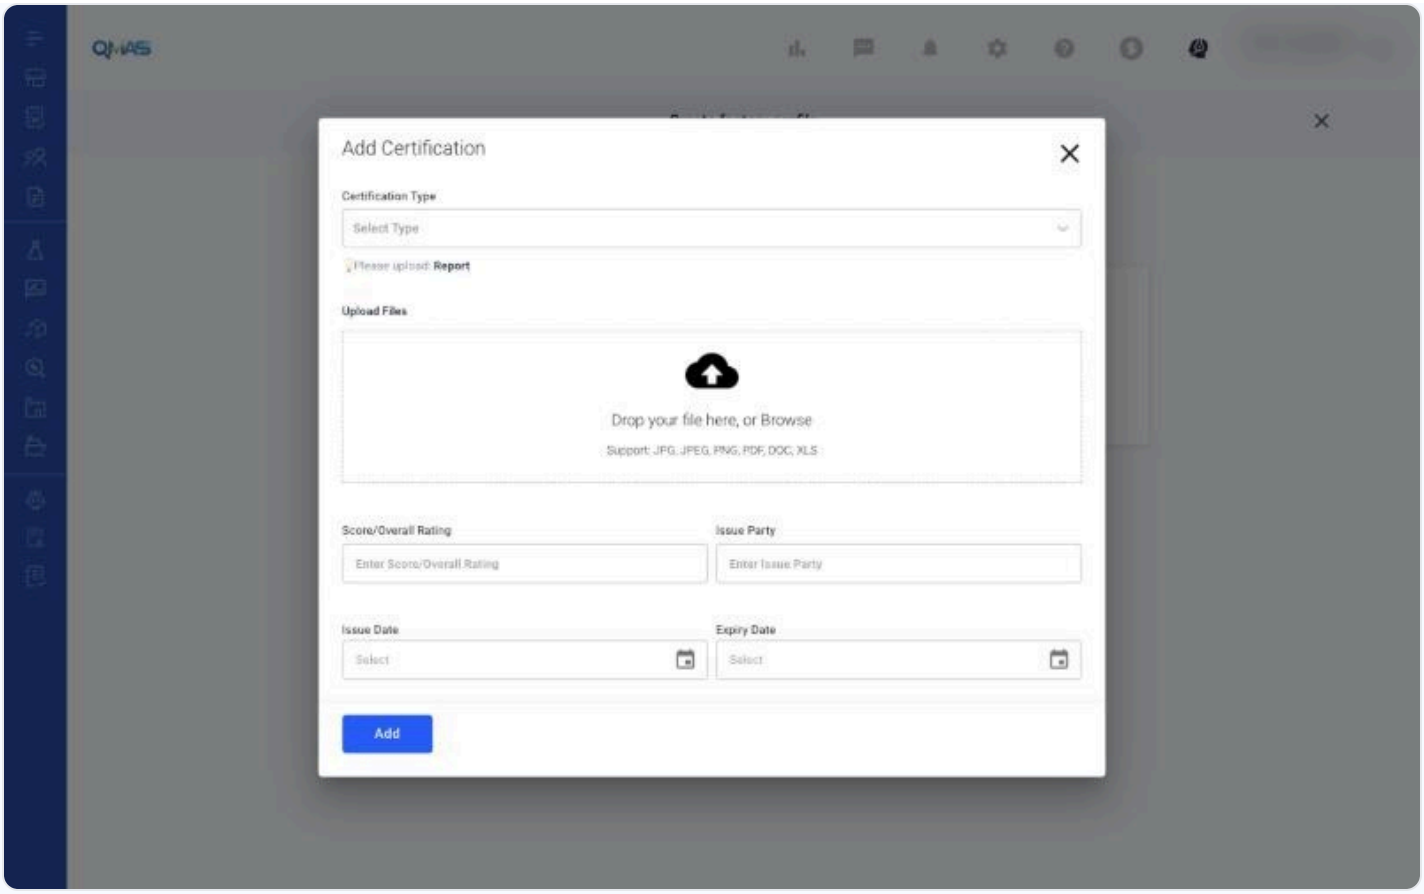

Click **Select category** for the product categories this factory makes, and **Select tag** for your own tags. Click **Next**.

Step 2 Classification.

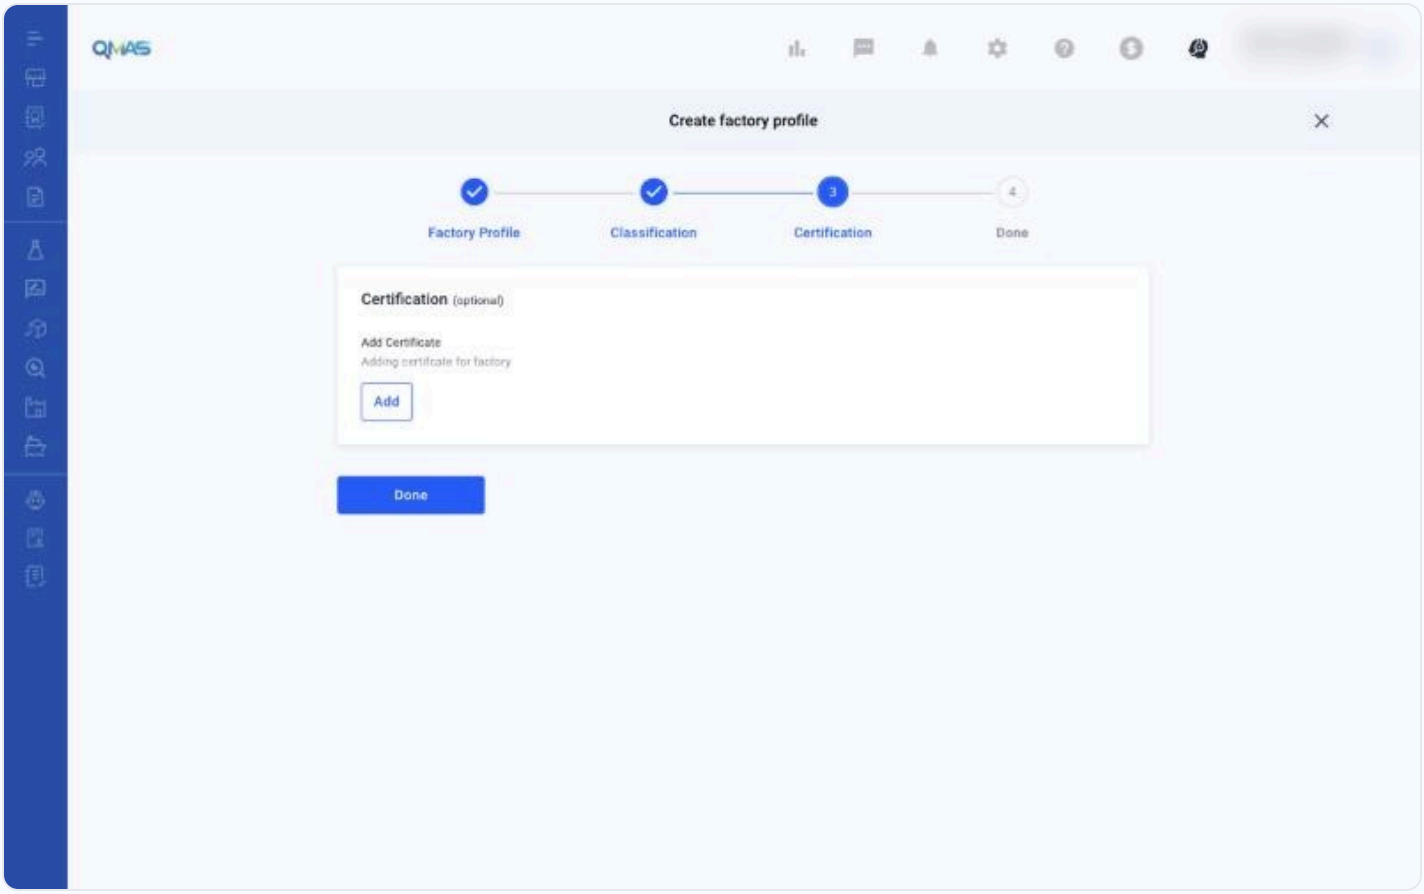

6. Certification (optional)

Click **Add** to attach an audit report or certificate. In **Add Certification**, choose the certification type, upload the file (JPG, JPEG, PNG, PDF, DOC or XLS), and fill in the score or overall rating, issue party, issue date and expiry date. Click **Add**.

Add Certification pop-up.

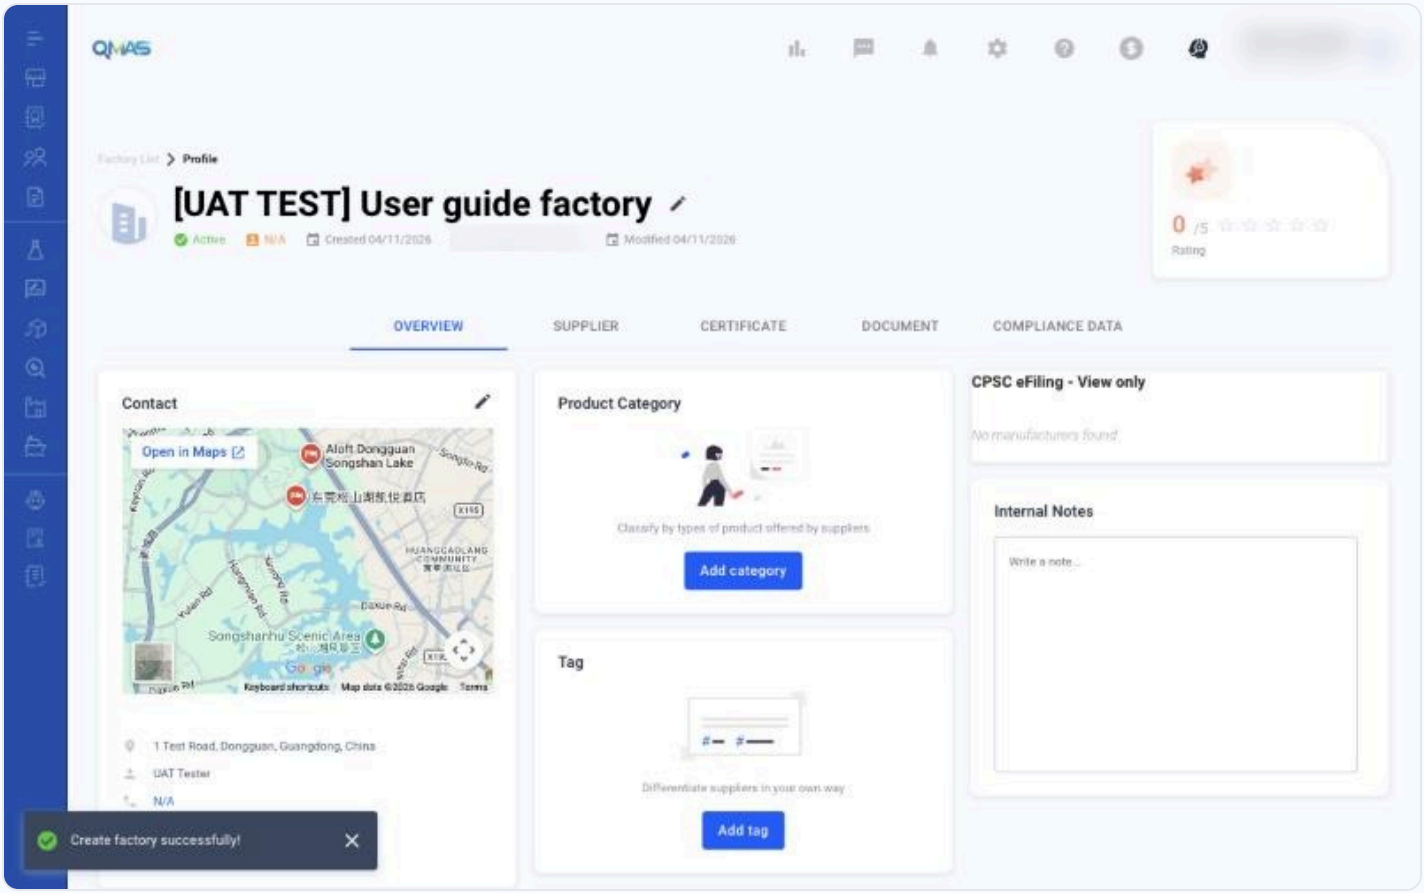

Click **Done** to create the factory.

Step 3 Certification.

7. Done — factory profile

QMAS shows “Create factory successfully!” and opens the factory profile. Use the tabs **Overview**, **Supplier**, **Certificate**, **Document** and **Compliance Data** to manage what is linked to this factory.

Factory profile — Overview tab.

Tips

> Set the expiry date on audit certificates so you can see when they need renewing.

FAQ

How do I create a new factory?

Go to Supplier / Factory Management, click the Factory tab, then Create Factory. Fill in Factory Profile, then Next, Next and Done. Direct link: https://qmas.icw.io/supplier-manager/factory/create

Can I add many factories at once?

Yes. Click Import Factory on the Factory tab.

Where do I upload a factory audit certificate?

In step 3 Certification of Create Factory, or later from the Certificate tab of the factory profile.
