Getting Started — Home, Settings and Company Profile

Find your way around QMAS: the Home page, the top bar and your company settings.

Home	https://qmas.icw.io/home
Company Profile	https://qmas.icw.io/company-profile
Checked against	QMAS dev, 4 Nov 2026

Overview

1. **Home** shows quick workflows, items that need your attention, and an overview of your business.
2. The **left menu** opens each module.
3. The **top bar** has analytics, messages, notifications, settings, help and credits.
4. **Settings** (gear icon) opens Company Profile, Password, Languages, Account Management and Assign TicMart Job.

Step-by-step

1. Home

TicMate asks “What would you like to do today?” and lists quick workflows:

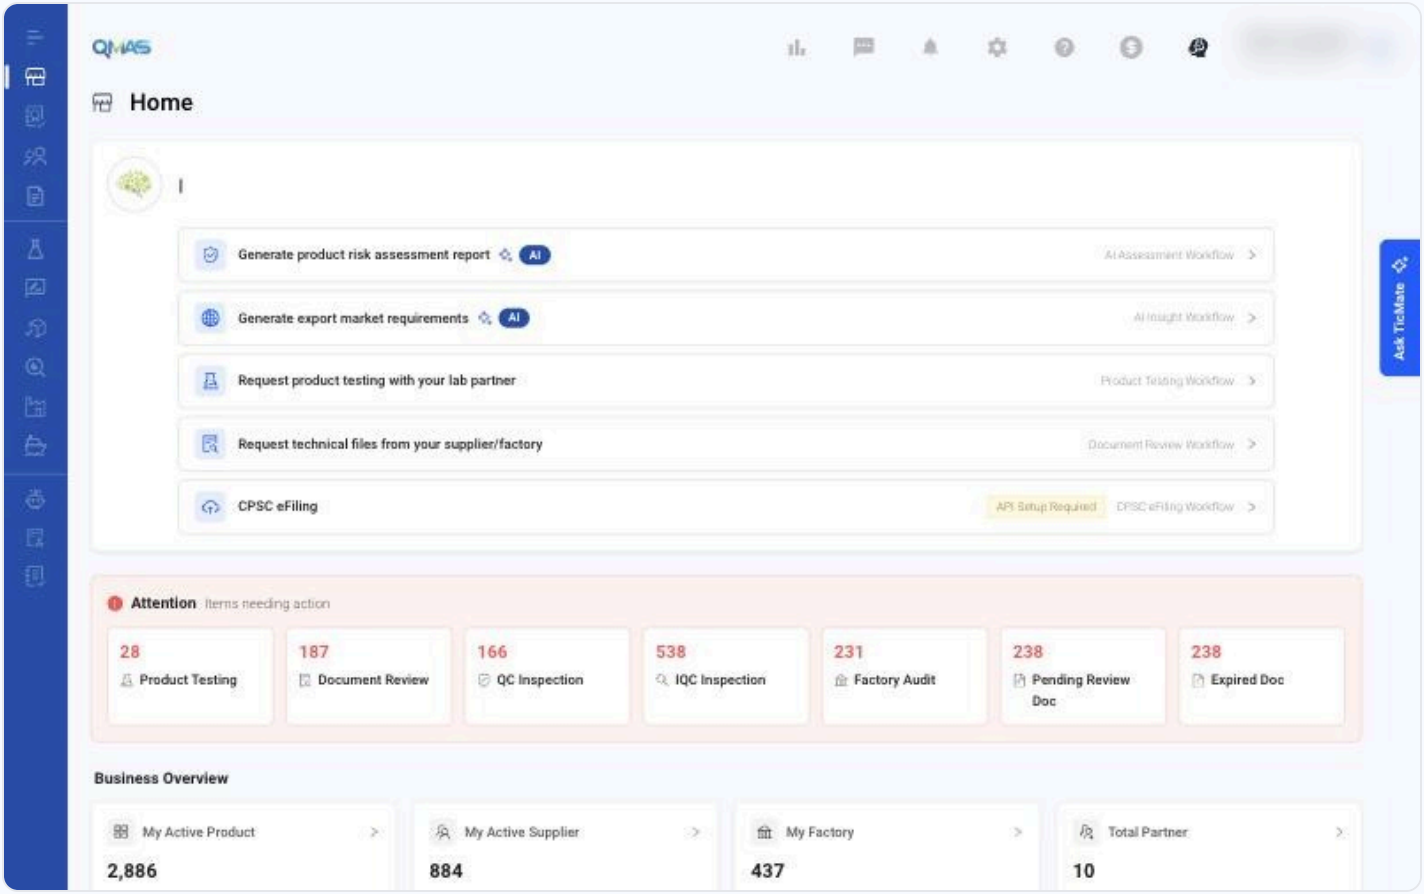

- **Generate product risk assessment report** (AI Assessment workflow).
- **Generate export market requirements** (AI Insight workflow).
- **Request product testing with your lab partner** (Product Testing).
- **Request technical files from your supplier/factory** (Document Review).
- **CPSC eFiling**. If it shows “API Setup Required”, set up your Certifier ID in Company Profile first.

Attention counts the items that need action in each module, such as Product Testing, Document Review, QC Inspection, IQC Inspection, Factory Audit, Pending Review Doc and Expired Doc. Click a card to see

them.

Business Overview shows your active products, suppliers, factories and partners. Click › to open the list.

Ask TicMate on the right edge opens the TicMate assistant.

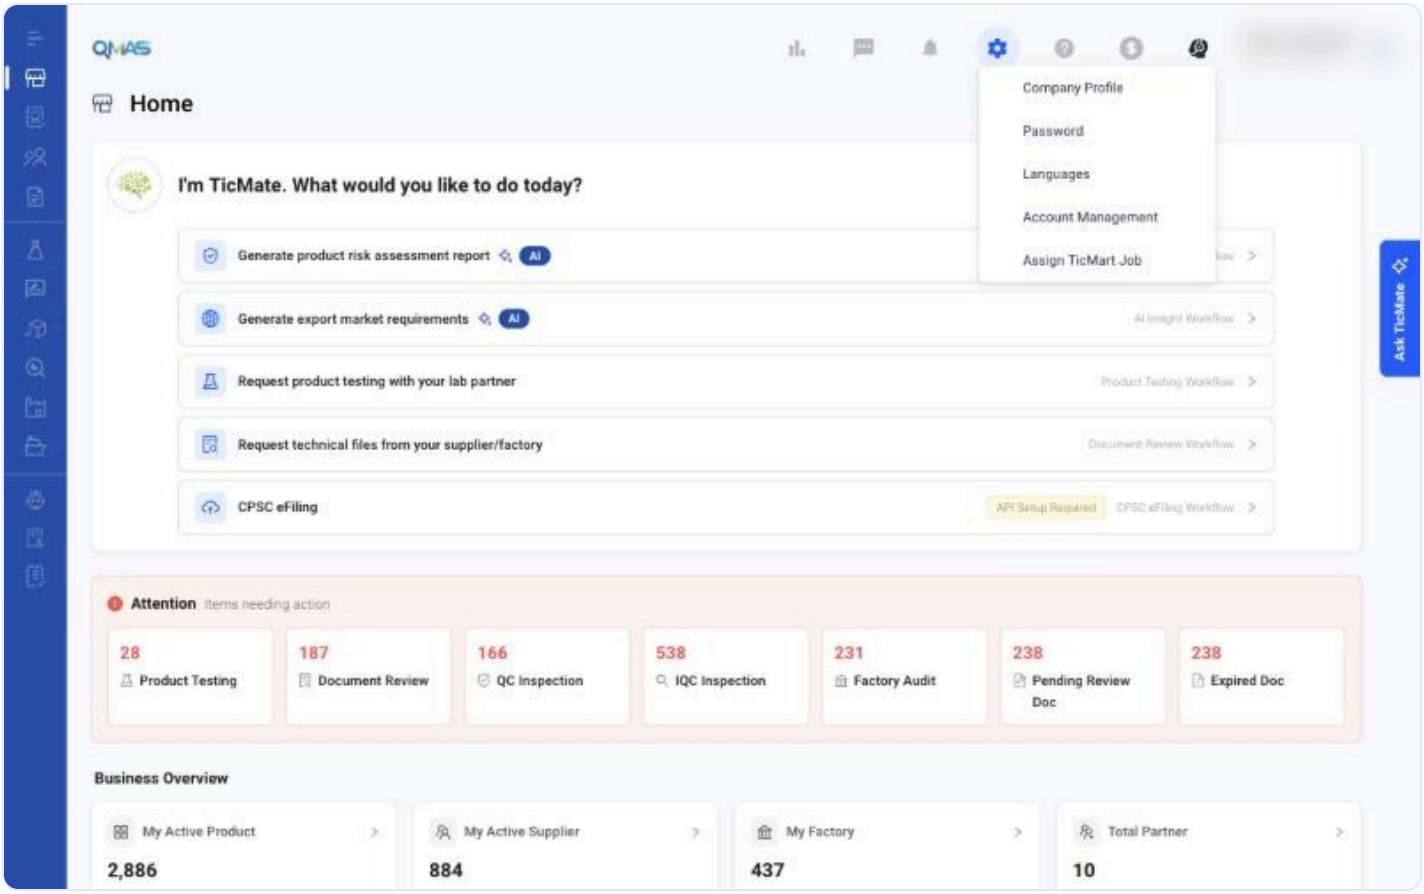

Home page.

2. Settings menu

Click the gear icon in the top bar:

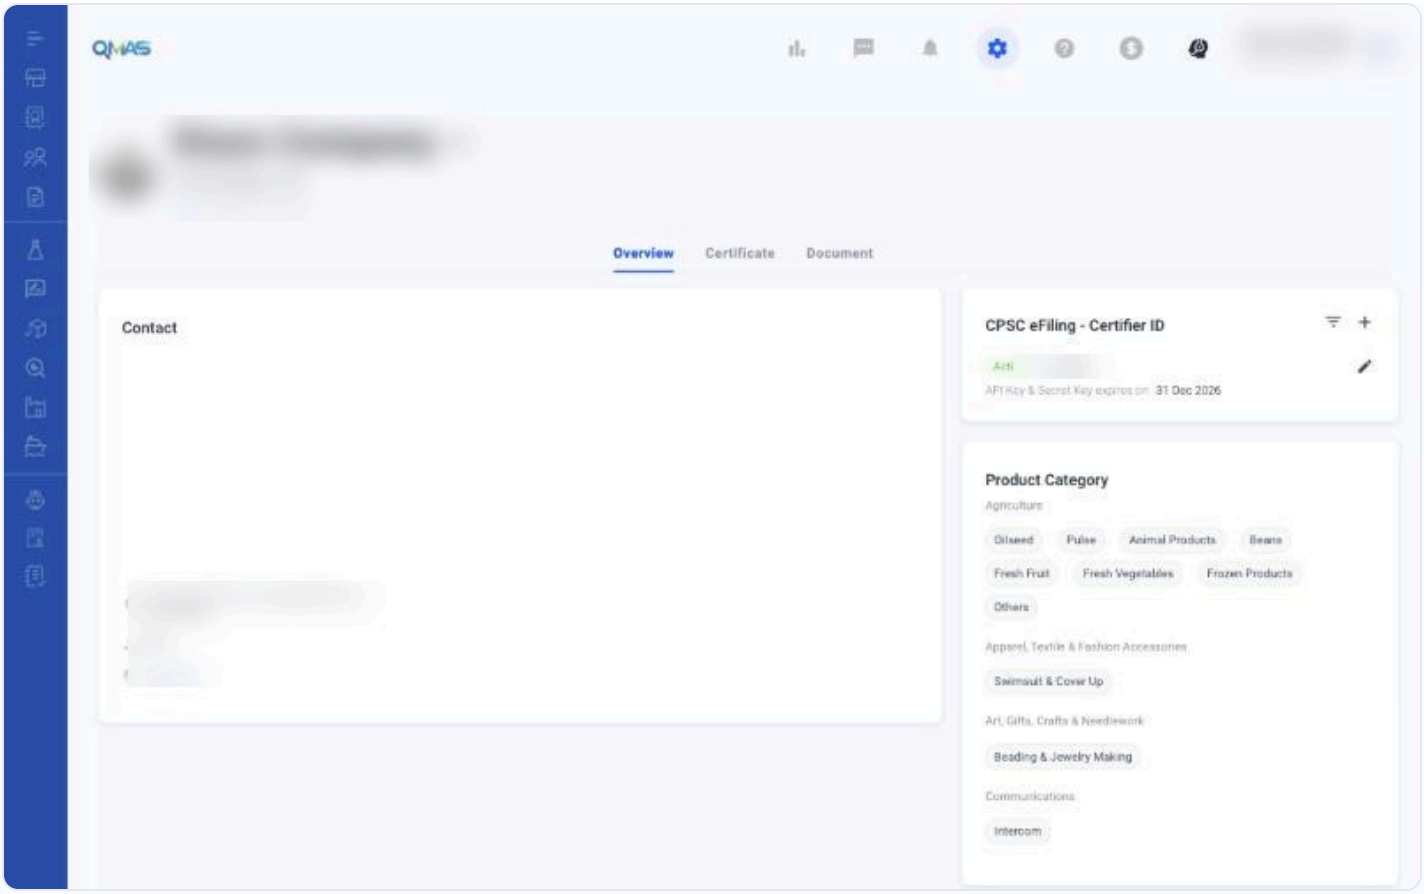

Option	What it does
Company Profile	Company details, certificates, documents, product categories and CPSC eFiling Certifier ID.
Password	Change your password.
Languages	Change the system language.
Account Management	Manage your company's user accounts.
Assign TicMart Job	Assign jobs from the TicMart marketplace.

Settings menu.

3. Company Profile

Click the pencil icon next to the company name to edit it. The **Overview**, **Certificate** and **Document** tabs hold your company information. **CPSC eFiling - Certifier ID** is where you add and manage the API key for eFiling. **Product Category** lists the categories your company works with.

Company Profile.

Tips

> The question-mark icon opens the QMAS Help Center.

> The coin icon shows your credits and tokens for paid features such as AI Insight.
